The screenshot shows the GitHub interface for the repository 'lukasz-madon / awesome-remote-job'. At the top, there are buttons for 'Watch' (581), 'Unstar' (8,591), and 'Fork' (802). Below these are tabs for 'Code', 'Issues' (7), 'Pull requests' (1), 'Projects' (0), 'Wiki', 'Pulse', and 'Graphs'. The main description reads: 'A curated list of awesome remote jobs and resources. Inspired by <https://github.com/vinta/awesome-python>'. There are three tags: 'awesome-list', 'awesome', and 'list'. Below this, statistics show '608 commits', '2 branches', '0 releases', and '182 contributors'. Action buttons include 'Branch: master', 'New pull request', 'Create new file', 'Upload files', 'Find file', and 'Clone or download'. A recent commit by 'RichardLitt' is shown, merging branch 'pr/355' with the latest commit 4933f34 from 18 days ago. The commit history lists 'CONTRIBUTING.md' (3 months ago) and 'README.md' (18 days ago). The 'README.md' file content is visible, featuring the title 'Awesome Remote Job' with a GitHub 'awesome' badge and the text 'A curated list of awesome remote working resources.'

@cassiobotaro O mutex precisa ser criado antes e compartilhado: <https://play.golang.org/p/t5OkG1mPNb>

Só não passe o mutex solto, mantenha numa struct

Paulo Casaretto

11:26 AM

um RWMutex provavelmente ajudaria, certo?

Carlos Lenz

11:45 AM

o RWMutex permite melhorar a concorrência ao implementar um cache de resposta, mas aí entram novos requisitos (qual a duração, etc) se houver apenas um arquivo e a checagem não é refeita por um longo período, ou existem poucos consumidores, e poucas consultas, provavelmente não vale a pena a implementação mais complexa (edited)

@lenz desculpa me intrometer, mas fiquei curioso pq passar numa struct, pode dar algum problema se fosse uma variável?

Carlos Lenz

1:33 PM

tranquilo @renatosuero

normalmente vc tem uma estrutura de dados q é protegida pelo mutex (um map por exemplo), então deixar os 2 juntos é bom pra sua sanidade 😊
Se vc não tem isso no início (nesse caso era o filesystem, se não tiver cache em memória), vc pode fazer mais simples:

type FSControl sync.Mutex

dessa forma vc pode adicionar métodos (o "this" deve ser ponteiro por causa do Mutex)
e quando precisar acrescentar uma estrutura de dados fica mto + simples refatorar

Paulo Casaretto

1:35 PM

é, tomar cuidado pra não enviar uma cópia do Mutex
já cometi esse erro
